

Hexordia Data Structures Course - NOV 2025

\$1,500 Value

Stop guessing—start decoding. HDSC is designed for intermediate to advanced mobile forensics practitioners who want to break through data analysis roadblocks and master complex data structures.

In just two days, you will:

- Navigate SQLite, LevelDB, Android Binary XML (ABX), SEGB, PList, and Protobuf formats with confidence.
- Gain hands-on experience through labs using open-source and freeware tools.
- Learn advanced techniques to extract, analyze, and interpret hidden evidence.
- Understand how mobile data is structured and transform it into actionable intelligence.

Why HDSC?

- **Practical Skills:** Labs over lectures—apply what you learn immediately.
- **Expert Instruction:** Guidance from seasoned investigators.
- **Real-World Impact:** Strengthen your investigations and outcomes with advanced data decoding.

Don't just collect data. **Decipher it.**
